COVER LETTER

I am a versatile UI/UX designer with a diverse background in logistics, finance, computer science, and human-centered design. With a blend of technical and empathetic skills, my expertise lies in UX design, information architecture, and UI development. Over the course of my career, I have held various roles, ranging from UI developer and project manager to content strategist and information architect.

Furthermore, I am an experienced junior front-end developer with over 7 years of hands-on experience in HTML, CSS, JavaScript, jQuery, WordPress, Drupal, and other platforms. I have a strong track record of developing logistics platforms for mail forwarding projects, encompassing both back-office design and development. Additionally, I excel in building e-commerce websites and have a knack for crafting engaging landing pages and web solutions. My adaptability allows me to work effectively either independently or as part of a team.
